CI-10

The compact cash recycling system CI-10 which consists of banknote recycler CI-10B and coin recycler CI-10C can be adapted to various markets: vertical market (bakery, shop, etc), supermarket, and hypermarket. The CI-10 integrated into an existing POS system enables automated cash handling, improves security, staff productivity, customer service and fund efficiency. The CI-10 is stylishly designed in straight lines so that it can be integrated into cash desks / self-checkouts easily. A "Follow me" LED sign helps customer to operate by themselves comfortably. If the cash recycling system CI-100 is in place, The CI-10 and CI-100 offer secure closed cash management. A stacking collection cassette is also available in case the CI-100 is not in place.

Data interface protocol
SOAP over HTTP(S)
Data interface port

	United states	UL		

*SCC: Stacking collection cassette
*IFC: Interface cassette

*The capacity of coins is calculated in 10 EURO cent.

Functions of CI-10

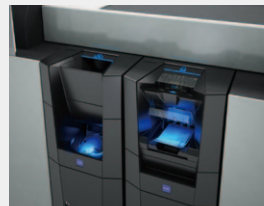

Secure closed cash management with CI-100

Interface cassette of the CI-10 makes secure closed cash management possible with CI-100.

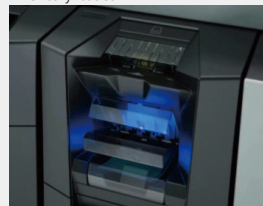

Stylish design and "Follow me" LED sign

Easy integration into cash desks / self-checkouts and easy operation for any customer.

Exit shutter

Avoids handing over partial change to a customer in case of incomplete dispensing due to jamming / inventory issues.

Error Recovery Animation

If an error occurs, the POS screen can show a troubleshooting animation to resolve the problem.

CI-SERVER, Cash management software

The CI-SERVER which can be operated via a web browser offers centralized cash management.
