

# GLORY Retail Solution CASHINFINITY®

## Cash Management Software CI-SERVER

### SMART Cash Management

## CI-SERVER specification

Interface protocol	SOAP over HTTP(S)
Number of connectable units	CI-SERVER - unlimited CI-SERVER Small - up to 3 units
Database	Microsoft SQL Server 2008 Express
Programming Language	Java™ 6
Web Server	Apache HTTP Server 2.2.21 or later Apache Tomcat 6 or later
Using TCP Port	The following TCP port must be free: - 80 for Web Server - 1433 for SQL Server 2008
Functions	Management of the cash inventory of all in-store CASHINFINITY® devices Management of the device status of all in-store CASHINFINITY® devices Configuration for all in-store CASHINFINITY® devices Remote update firmware / template recognition of all in-store CASHINFINITY® devices Remote log reading of all in-store CASHINFINITY® devices <Option> Wi-Fi operation tool for PDAs / Smartphones Email notification

### CI-SERVER

Cash Management Software CI-SERVER, which can be operated via a web browser, offers centralized cash management throughout a store: front/back office, interface cassette under transportation and the safe in the back office. The compact cash recycling system CI-10 and the cash recycling system CI-100 notify the inventory and all events to the CI-SERVER seamlessly. A store manager can refer to the inventory in real-time and the CI-SERVER generates cash flow statistical reports. The CI-SERVER has also an email function which automatically sends an email to the manager in case of full/empty cash status, collection/replenishment, and errors, etc.

## Required hardware specification

OS	Microsoft Windows 7 Professional Microsoft Windows XP Professional
Hardware	Intel x86 or compatible processor Minimum of 1GB RAM (Windows 7) , 512MB RAM (Windows XP) Minimum of 16GB HDD (Windows 7) , 2.1GB HDD (Windows XP) TCP/IP protocol support
Monitor	A monitor with a minimum resolution of 1,024 x 768

\*CI-SERVER is software. Hardware is not provided by GLORY.

## Client restriction

Browser	Internet Explorer 7 or later Firefox 3.6 or later
---------	--

## Functions of CI-SERVER

### Centralized cash management

Centralized management for the cash inventory of all CASHINFINITY devices.

### Real-time device status watching

Centralized management of the status of all in-store CASHINFINITY devices. Status information can be notified via email.

### Generates cash flow statistical reports

CI-SERVER figures out the ratio of cash-in and cash-out to generate cash flow statistical reports.

### Operated via a web browser

CI-SERVER is operated via a web browser. All CI-SERVER features can be accessed from any PC on the network.
